

Iberian AtLAST days

IBERIAN
AtLAST DAYS
2026

UNIVERSIDAD COMPLUTENSE DE MADRID, 4-5 JUNE 2026

Funded by
the European Union

Thursday 4 June 2026 - Friday 5 June 2026

Facultad de Ciencias Físicas

Scientific Programme

We will feature a mixture of talks highlighting the key aspects of AtLAST as well as invited talks, contributed talks and posters.

We expect contributions spanning the many areas of interest within the Spanish and Portuguese astronomical communities that are relevant to AtLAST, including (but not limited to) refining its science cases, observational simulations and forecasting, plans for instrumentation, data management, pipeline development, sustainability, and synergies with multi-messenger/multi-wavelength facilities.

The list of invited speakers and a more refined program will be available soon. **Stay tuned!**
